

Meeting Report – 18-03-2025

1. Attendees

- BOUSSEKINE Mohamed Ismail
- FERKIOUI Akram
- AMEDJKOUH Darine
- HAMMOUTI Walid
- BENTALEB Lisa

2. Points of Discussion

A. Feedback from Teacher Meeting with Mr. El Hadi Khoumeri

- **Planning Tool Update:**
 - Mr. El Hadi Khoumeri advised against using JIRA solely for planning.
 - Recommended switching to a **Gantt chart** approach to visually manage timelines and dependencies more effectively.

B. Timeline & Progress Review

- The team confirmed that the project timeline is being met with no delays.
- Every phase of the project is on track, and the team expressed confidence in meeting upcoming milestones.

C. Database Schema and Data Integration

- Detailed discussion on the proposed **database schema**:
 - Finalizing data types and relationships between entities.
 - Planning the data fetching process to transition from dummy data to real, live data.
- Decided to begin the integration process in the coming week to enable testing with real data.

D. Review of Last Week's Tasks (Previous Week)

Website:

- **Dashboard:**
 - Completed the user dashboard with key functionalities, including quick access to personal information.
- **Gigs Page:**
 - Finalized the layout and implemented core features to display available gigs.
- **Categories Page:**
 - Designed and styled the page to allow users to navigate through different service categories.
- **Profile Page:**
 - Developed a comprehensive user profile page, including options for editing and updating personal details.

Mobile App:

- **Categories Page:**
 - Designed and implemented the UI for browsing service categories.
- **Gigs Page:**
 - Completed the layout and basic functionalities to showcase gigs, including a DEMO version for initial testing.

3. Tasks for Next Week (Upcoming Week Tasks)

Website Tasks:

- **Discover Page:**
 - Develop and integrate interactive elements for exploring trending gigs and featured services.
 - Ensure the page supports dynamic content updates from the database.
 - **Community Page:**
 - Build a section to facilitate user interactions, discussions, and feedback.
 - Include social sharing options and community guidelines.
- 

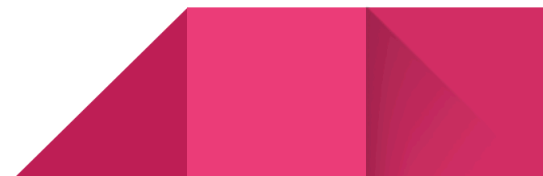

- **About Us Page:**
 - Create a detailed informational page outlining the mission, vision, and background of RIGELNI.
 - Incorporate multimedia elements (images, videos) for enhanced engagement.
- **Real Data Integration:**
 - Begin fetching data from the newly designed database schema.
 - Replace placeholder content with live data for a more realistic user experience.

Mobile App Tasks:

- **Data Fetching Implementation:**
 - Start integrating API calls to fetch real data from the database.
 - Update the UI components on the categories and gigs pages to reflect live content.
- **Bug Fixes & Optimization:**
 - Review the current DEMO version of the gigs page and implement necessary optimizations.
 - Enhance the responsiveness of the authentication flow based on user feedback.

Team Coordination:

- **Review Session:**
 - Organize a detailed review session at the end of the week to assess progress and resolve any integration issues.
- **Task Distribution:**
 - Ensure clear communication among team members regarding responsibilities.
- **Teacher Feedback Implementation:**
 - Begin drafting a revised planning document using a **Gantt chart** to replace the previous JIRA-only planning method.

4. Next Steps & Conclusion

- **Immediate Actions:**
 - Transition to using a Gantt chart for timeline visualization and task dependency management.
 - Initiate real data integration for both the website and mobile app to begin testing live scenarios.
- **Follow-Up:**
 - Schedule a follow-up meeting at the end of the next week to evaluate progress on the Discover, Community, and About Us pages, as well as real data integration.
- **Conclusion:**
 - The 4th meeting reaffirmed the project's on-track status and clarified upcoming tasks. The teacher's feedback was taken into account, leading to a shift towards a Gantt chart for planning. The team is set to complete the current phase by integrating real data and developing key website & mobile app pages, ensuring continued progress without delay.
